ABOUT ME

Im to be 24 i've been in trade since a teenager. Once summer came along I was out there with my stepfather. Once I graduated high school I went full time and worked there for 3 years I learned the fundamentals of concrete and by the time I left I was consider a concrete finisher. I knew I wanted more out of the trade it wasn't enough. The more I saw the more I wanted to learn. I decided to work for a GC for 1 year to get a better understanding of the industry and how things are ran in a more professional environment. PIC was my personal favorite, not only did they gave me the opportunity to make more money but they also gave me the opportunity to travel, meet new people, and further my knowledge in complex forming and finishing skills. I got to help iron workers, riggers and electricians. I'm currently helping local subcontractors with no shows, emergency's, and other last minute cancellations.

EXPERIENCE

Precision Construction Company

2023 – 2023

Concrete finisher

Site prepping Saw cutting and removal of concrete Foundations and pits Precision sole plates and rails Trenching Complex forming and Concrete finishing (cyclones hydraulics, pits, stairs, additions for transforms) Helped other trades with general labor as well primarily iron workers and electricians.
